We create chemistry

Pulnoy, April 13th, 2023

We, BASF Beauty Care Solutions France SAS, state that:

- **Laricyl BC10206** differs from **Laricyl LS8865** and **Laricyl BC10111** by the origin of the raw material Fomes officinalis, which is, now, grown by solid state fermentation instead of harvested from wild, and differs from **LS8865** also by absence of Phenoxyethanol,
- Product activity, defined as pore tightening effect and the minimization of the appearance of oily skin, have been evaluated in a comparative clinical study between **Laricyl BC10206** and **Laricyl LS8865**: performance results have been confirmed as at least similar,

thus, based on these performance assays, we can state the following equivalence:

3% **Laricyl BC10206** ≈ 3% **Laricyl LS 8865** ≈ 3% **Laricyl BC10111**
