Care Creations™

Definition

IRWINOL® LS 9319 is a botanical wax, obtained by extraction from an exotic fruit: Irvingia Aubry Gabonensis, called **"Wild Mango"**.

BASF We create chemistry | Care Creations™

Botanical description

Irvingia Aubry Gabonensis can reach up to 35 meters (100 feet) of height.

It is found in the **tropical** and **subtropical forests.**

BASF We create chemistry | Care Creations™

Botanical description

The fruit has a diameter of 4 to 7 cm.

It turns yellow at maturity and looks like a small mango.

Its almonds are traditionally used for **food preparations** and to make **soaps.**

BASF We create chemistry | Care Creations™

Main Components

The active fraction of **IRWINOL® LS 9319** is mainly made of Triglyceride acids:

- **Myristic acid** (40 - 59%),
- **Lauric acid** (35 - 52%),

and the minor fraction contains an unsaponifiable type, made of **sterol** and **tocopherol**.

The support of **IRWINOL® LS 9319** consists of a mixture of a fatty alcohol and a glyceride of botanical origin.

Efficacy Tests

Irwinol® LS 9319 has been substantiated versus **Shea butter**, and has shown very positive results.

Tests available:

- ✓ **Conditioning effect**

- ✓ **Improvement of hair sensorial properties**

BASF We create chemistry | Care Creations™

Efficacy Tests

Protocol

Conditioning effect on human hair

Combing measurements before treatment

Traction machine

Treatment with emulsions

Placebo

Shea butter at 1%

IRWINOL® LS 9319 at 1%

Traction machine

Combing measurements after treatment

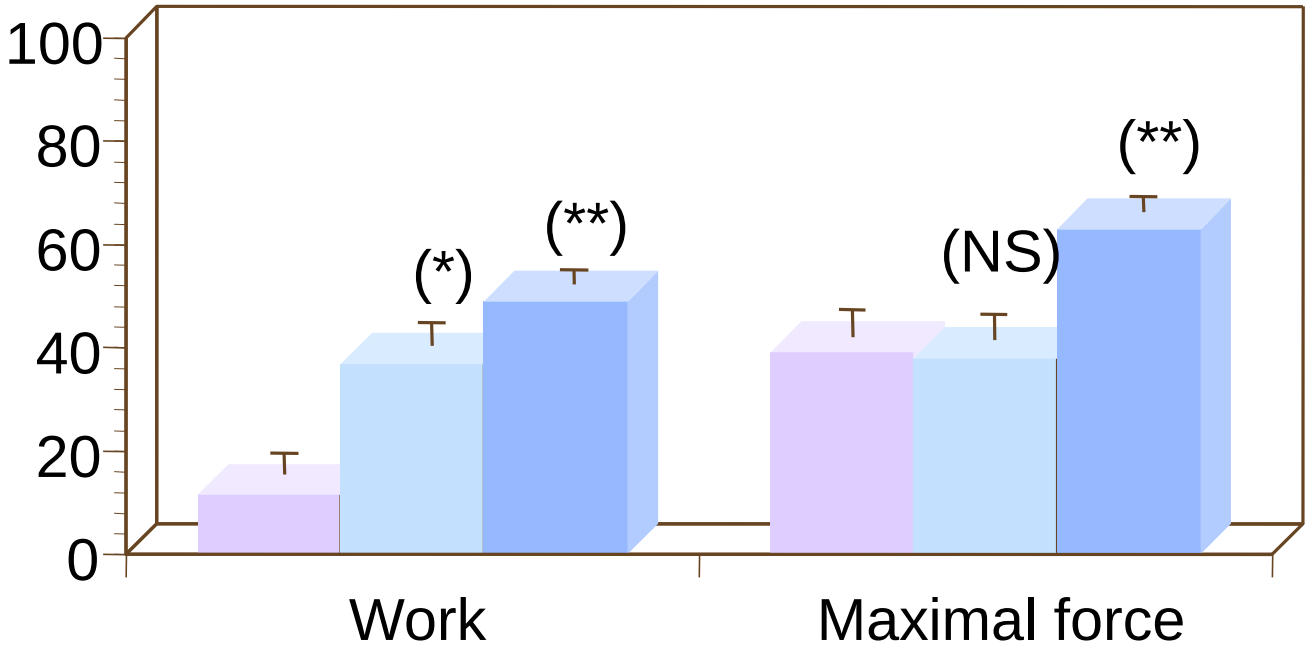

BASF We create chemistry | Care Creations™

Efficacy Tests

Conditioning effect on human hair

Results

Combing improvement when compared to before treatment (%)

- Placebo emulsion
- Emulsion with 1% Shea butter
- Emulsion with 1% IRWINOL® LS 9319

Statistics:
Average of 10 tests ± SEM
1 factor Anova
(*) significant/placebo
(**) significant/placebo and Shea butter
(NS) not significant

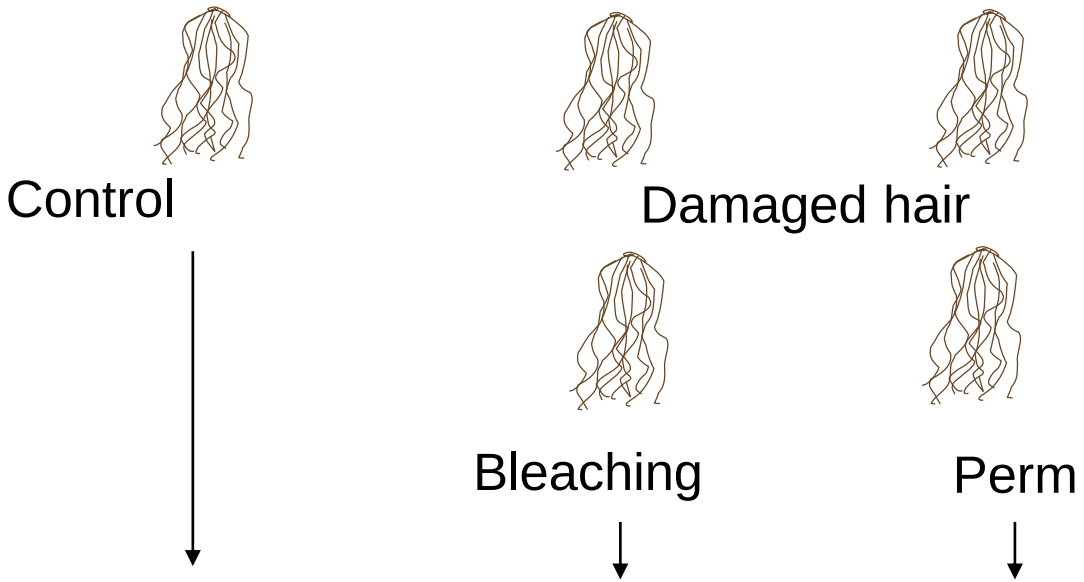

IRWINOL® LS 9319 shows a **significant conditioning effect**, even higher than the bench mark Shea butter at the dose of use.

BASF We create chemistry | Care Creations™

Efficacy Tests

Improvement of sensorial properties of hair

Protocol

- *Without treatment*
- *Treatment with a placebo rinse-off emulsion*
- *Treatment with a rinse-off emulsion + 1% shea butter*
- *Treatment with a rinse-off emulsion + 1% IRWINOL® LS 9319*

Efficacy Tests

Improvement of sensorial properties of hair

Protocol

Explanation of abbreviations:
A = combing force and untangling (wet hair)
B = combing force and untangling (dry hair)
C = suppleness and softness
D = static electricity
E = substance and volume
F = brilliance and brightness

BASF We create chemistry | Care Creations™

Efficacy Tests

Improvement of sensorial properties of hair

Conclusion

IRWINOL® LS 9319 has significantly improved hair sensorial properties, on normal as well as on damaged hair:

It improves ease of combing, increases hair brilliance without rendering hair heavy.

This effect is higher than with shea butter.

Technical Data

Aspect : Waxy paste, white to off-white, of weak odor

Dose of use : 0.5 - 1%

Solubility : IRWINOL® LS 9319 is insoluble in water, and soluble in oils and fats (T > 40°C)

Mode of incorporation : IRWINOL® LS 9319 is incorporated with the other constituents in the fatty phase, at the melting stage; then continue to homogenize under normal conditions

INCI Name : Octyldodecanol (and) Irvingia Gabonensis Kernel Butter (and) Hydrogenated coco-glycerides
