Care Chemicals

To whom it may concern,

We, BASF Beauty Care Solutions FRANCE SAS, certify that upon the information obtained from our raw materials suppliers, we can confirm the below listed detailed molecular weight from the 0.2% sodium hyaluronate contained in **C00087 HYALURONIC FS** (2 molecular weight ranges):

- 0.055% of High Molecular Weight at ≥1500 KDa,
- 0.145% of Low Molecular Weight at 250-450 KDa,.

We also confirm that, despite the high molecular weight supplier's update (former was 5-3000 KDa) for a more accurate value (≥1500 KDa), none of both sodium hyaluronate listed above has undergone any change: quality, supplier, specifications and product grade have kept unchanged for decades.

Consequently, the product remains strictly the same.

Sincerely yours,
